Microzine is the learning library on disk.

Every issue contains four challenging programs to help students master basic subject matter skills and learn key curriculum concepts while they enjoy themselves on the computer. It's like taking part in a variety show that spins yarns, makes music, tickles your imagination, and challenges you to think, read, write, and reason. Each issue includes a science simulation, a math feature, a problem solving and visual discrimination program, and a Twistaplot interactive reading adventure based on a social studies theme.

Microzine Awards

1984 Best Software of the Year • *Classroom Computer Learning & Learning Magazine*
